1980 CENSUS
PROFILE FOOTNOTES

1 The count of households in the complete count tabulations by definition equals the number of occupied housing units. In this document, the terms households and occupied housing units are used interchangeably.

2 Vacant seasonal/migratory units are excluded from all other tabulation matrices.

3 For data tabulated on a 100-percent basis, includes all persons in the category "Other." For sample data, excludes those persons who have a write-in entry of an Asian & Pacific Islander group in the "Other" category.

4 "Asian and Pacific Islander," in the 100-percent tabulations, includes: "Japanese," "Chinese," "Filipino," "Korean," "Asian Indian," "Vietnamese," "Hawaiian," "Guamanian," and "Samoan." "Asian and Pacific Islander," in sample tabulations, includes the groups listed above and those persons who have a write-in entry of an Asian or Pacific Islander group in the "Other" category.

5 Relatives include: householder, spouse, and the questionnaire categories: "Son/daughter," "Brother/sister," "Father/mother," and "Other relative." Tabulations of "Other relatives" include all categories not shown separately in the matrix.

6 Nonrelatives include the questionnaire categories "Roomer, boarder," "Partner, roommate," "Paid employee," and "Other nonrelative." Tabulations of "Nonrelatives" include all categories not shown separately in the matrix.

7 Tabulations of "Persons in household" based on 100-percent data by definition are the same as tabulations of "Persons in unit." The phrase "Persons in household" is used unless the matrix is stratified by a housing item such as tenure, plumbing facilities, etc., in which case, the phrase "Persons in unit" is used. Tabulations of "Persons in unit" based on sample data are not necessarily the same due to differences in the procedures used to inflate sample population and housing data.

8 A "Child of householder" includes any son, daughter, stepchild, or adopted child of the householder. An "Own child of householder" is a never-married child under 18 years of age who is a son, daughter, stepchild, or adopted child of the householder. "Related children" include not only own children but also all other family members, regardless of marital status, who are under 18 years old, except the householder or spouse. Foster children are included in the "Nonrelative" category.

9 Vacant housing units include the questionnaire categories: "For rent," "For sale only," "Rented or sold, not occupied," "Held for occasional use," and "Other vacant." Tabulations of "Other vacant" include all categories not shown separately in the matrix.

10 This aggregate, along with the relevant count will permit the computation of a mean. For example, the aggregate value for the owner-occupied noncondominium units will yield the mean or average value when divided by the number of specified owner-occupied noncondominium units, and the aggregate number of rooms for occupied and vacant year-round units yields the mean or average number of rooms. (See footnote 14 prior to computing mean value.)

11 The noncondominium value distribution is restricted to certain kinds of "owner-occupied" or "vacant for sale only" units. The following are excluded from the tabulations on value for noncondominium units:

A. Units at an address with two or more units
B. Units on 10 or more acres
C. Units with a commercial establishment or medical office on the property
D. Mobile homes or trailers

Value is tabulated for all owner-occupied and vacant-for-sale condominium units.

12 Contract rent is tabulated for all "renter-occupied" and "vacant-for-rent" units except 1-family houses on a property of 10 or more acres. Units tabulated in the "No cash rent" category are all occupied housing units reported as "No cash rent" except one-family houses on 10 or more acres.

13 Lacking complete plumbing (facilities) for exclusive use includes: Complete plumbing (facilities) but also used by another household, some but not all plumbing facilities, or no plumbing facilities.

14 Multiply the aggregate value by $250 to obtain the true value. The tabulation was scaled by a factor of $250 for tally purposes.

INTRODUCTION

This report is a profile of labor force and employment characteristics from the 1980 Census of Population and Housing. It is volume IV of a series of Municipal Profiles published by the New Jersey State Data Center (NJSDC). Previous reports showed demographic and housing characteristics from complete count data of the 1980 Census, While this report includes items from the sampel data of long form of the census questionnaire. These tabulations were included on the U. S. Census Bureau's Summary Tape File 3A. This publication was designed and written by Charles Crowley, demographer, NJSDC.

A one-page profile consisting of ten tables is shown for the State of New Jersey, New Jersey counties and minor civil divisions. The first five tables report on the labor force status and employment characteristics of persons the week before completing the census questionnaire, that is, the week before April 1, 1980 for most but not all persons. The last five tables are items on labor force experience in 1979. Explanations of census terms and concepts used in this report can be found in the "Definitions and Concepts" section of this publication.

Additional reports have been published from the 1980 census data by the NJSDC. To obtain census information contact the county planning board board for the geographic area of interest, the New Jersey State Library, or the Newark Public Library. These agencies are members of the NJSDC census data distribution network.

Questions about this report should be addressed to: New Jersey State Data Center, Division of Planning and Research, Department of Labor, CN 388, Trenton, NJ 08625-0388.

A full discussion of the census sample design and all items included on STF3 can be found in the U. S. Bureau of the Census publication, "Census of Population and Housing, 1980, Summary Tape File 3 Technical Documentation".
